### Market Strength Due to Good News from Front.

By BROADAN WALL.

New York, Sept. 14.-The actual bank statement today showed surplus reserves decreased \$33,761,230; loans decreased \$31,750,000, and not demand deposits decreased \$13,8.4,000. The aver-

posits decreased \$13,54,000. The averaged \$13,705,540; loans decreased \$5,500, and net demand deposits demand that it was in greatest awing at the close of the week. It leaves it an open question whether the liquidation is completed. Action of the market today indicated that the urgent selling was finished. action of the market today indicated that the urgent selling was finished. The strength of the market may, however, be due to the splendid, news, from France and the expectation of more of the same kind before the opening Monday.

It is also apparent that some short selling was indulged in during the week for there was urgent buying

sening was indused in this the week, for there was urgent buying in some issues that had broken the most. Advances in these were sharp, notably in Sumatra, Alcohol and United States Steel. But careful in-United States Steel. But careful in-vestigation proves that most of the selling was for the account of wire houses and was of thinly margined, accounts. It has been made clear to pools that they must be very con-servative if they operate at all.

### Oil Shares Strong.

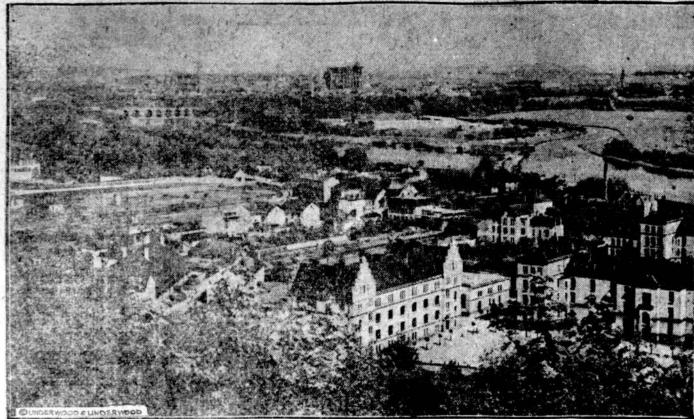

Oil shares were strong largely bemnortance of the new point of view taken by the Mexican government in regard to taxes and the objection-able clause of the Federal Constitu-

tion.

Fexican Petroleum responded to this better feeling. So did Texas. The gasolineless days are making all the people realize the value of petroleum stocks. War is a bullish factor on such shares and peace is doubly so. Such shares are being accumulated by important persons in his way and onletly. That is why cumulated by important persons in a bis way and quietly. That is why the stocks find no visible support. Their best friends want them to stay heavy for the present. Those in closest touch with Mexican affairs say the crisis is past. Recent news from France has made a tremendous impression in Mexico.

### Army and Navy News

As to the great work of the United States troop transport Levist (formerly the German liner Va land) in transporting troops act the Atlantic Sir Joseph Maclay, a the Atlantic Sir Joseph Maclay, siping controller of Great Britain an article in the New York Timesays: "This enormous vessel recent reached a French port with 11,000 m on board. What happened? The troops, almost equivalent to a will German division, were disembara-German division, were disembard, 4,00 tons of coal were taken on bor d. and within forty-eight hours the Leviathan was or her way back to the United States." The story is told that during a recent trip of the Leviathan to the United States wireless message was received aboard, presumably from a German submarine, which said: "Slow up, you are too far shead of your convoy." The message, it is said, was answered from the Leviathan as follows: "Go to Hell, we are bound for —" (deleted.)

The enrollment of women for service The enrollment of women for service in the Marine Corp Reserve continues; and the commandant, U. S. M. C., has about decided, in view of the fact that summer will soon be over, not to require the women thus carolled to wear a uniform until colder weather. Prior to the approach of the winter seaon the uniform will be fully determined and provision made for its issuance. It was deemed advisable to defer the selection of the uniform for issuance. It was deemed advisable to defer the selection of the uniform for the reason that it would be a considerable expense at the present time and the light-weight uniforms will have to be discarded within a few months. It may be stated, however, that the women who are enrolling will, be fully equipped and that the will. that the women who are enrolling with be fully equipped and that the unity form under consideration will be quite in keeping with the distinctiva appearance which has always charac-terized the personnel of the Maries,

The Navy Department's G O. 48, with its direction that "every officer in the navy shall be designated and addressed by the title of his rank without any discrimination whatever" goes deep into the heart of the old-controversy between the line and staff and will be accepted by the naves as the triumph of the civilian idea in this particular, since elviliens have always been meticular, since elvisions mayer always been meticulous in the application of line titles even when the use of them was not according to law and regulations. Doubtless the Secritary's action will cause quite as much excitement in the navy as would an announcement that the German ficety was coming forth to give hattle-and was coming forth to give battle-are possibly no less strife, although no in a material field.

### THE GLORY OF GOD IS INTELLIGENCE.

### Knowledge Is Power in Heaven as on Earth.

By DR. JAMES E. TALMAGE. Of the Council of the Twelve, Church of Jesus Christ of Latter-Day Saints, Salt Lake City, Utah.

In a revelation to Abraham the Lord | ter as evil Reverting to the figures

THE HEAVENS ABOVE, AND IN THE EARTH BENEATH, IN ALL WISDOM AND PRUDENCE, OVER ALL THE INTELLIGENCES THINE EYES HAVE SEEN FROM THE BEGINNING. I CAME DOWN IN THE BEGINNING IN THE MIDST OF ALL THE INTELLIGENCES THOU HAST SEEN."

In such wise did God make known anciently the power by virtue of which he is supreme over all the intelligencies that exist—the fact that He is more intelligent than any sund all others. In the heavens as upon the earth the aphorism holds good that KNOWLEDGE IS POWER, providing that by "KNOWLEDGE" we mean application, and not merely mental possession, of truth. In a revelation through Joseph Smith the prophet given in 1833, the character of Divine authority and power is thus sublimely summarized: "THE GLORY OF GOD IS INTELLIGENCE." (Doctrine & Covenants 28:36.)

The context of the passage shows that the intelligence therein referred to as an attribute of Deity, is spiritual light and truth is thus made certain: "HE THAT KEEPETH HIS COMMENTS. RECEIVETH TRUTH AND LIGHT, UNTIL HE

In a revelation to Abraham the Lord made known the existence of spirits appointed to take bodies upon the earth. These spirits were designated as "THE INTELLIGENCES THAT WERE ORGANIZED BEFORE THE WORLD WAS," and elsewhere in the same record spirits are called intelligences. (See Pearl of Great Price. Abraham 3:21, 22.)

This usage of the term has gained a place in modern English, as lexicographers agree. The Standard Diritionary gives us the following as one of the specific definitions of INTELLIGENCE: "An intelligent being, is pecially a spirit not embodied; as the INTELLIGENCES of the unseen world: the Supreme INTELLIT GENCE."

The word is current as connoting (1) the words is current as connoting (1) the words is current as connoting (1) the model is current to the find that every purple who is admit that every purple whit is admit that every purple whi

The word is current as connoting (1) the mental capacity to know and understand; (2) knowledge itself, or the thing that is known and understood; and (3) the person who knows and understands. Beside these there are
